OBJECTIVE

Motivated third-year B.Tech Computer Science and Business Systems student with a strong foundation in programming, Data Structures and Algorithms, Object-Oriented Programming, databases, computer networks, and web development. Experienced in developing data analytics solutions and full-stack web applications through academic projects and a Web Development internship. Seeking an internship opportunity to apply technical skills, contribute to real-world projects, strengthen problem-solving abilities, and learn from experienced engineering teams.

EDUCATION

B.Tech – Computer Science and Business Systems (CSBS) **Expected 2028**
BV Raju Institute of Technology, Narsapur, Telangana, India *CGPA: 7.15/10*

Intermediate – MPC **2022 – 2024**
Alphores Junior College, Karimnagar, Telangana, India *Percentage: 85.5%*

TECHNICAL SKILLS

Programming Languages: Python, Java, C++
Core Computer Science: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Operating Systems (OS), Computer Networks (CN), Database Management Systems (DBMS)
Web Development: HTML, CSS, JavaScript, React, UI/UX
Databases: MySQL, PostgreSQL, Elasticsearch
Frameworks and Technologies: FastAPI, REST APIs, JWT Authentication
Developer Tools: Git, GitHub, Docker, Google Colab, VS Code, Anaconda

EXPERIENCE

Web Development Intern **July 2026**
InAmigos Foundation – Remote *Web Development*

- Successfully completed a Web Development internship at InAmigos Foundation, gaining practical experience in designing and developing web-based solutions.
- Contributed to the development of an AI-powered Insider Threat Behavioral Intelligence System using the CERT r4.2 dataset containing over 28 million HTTP records, 2.6 million emails, and approximately 1,000 users.
- Engineered a memory-efficient Exploratory Data Analysis (EDA) pipeline using Polars Lazy API for efficient processing of large-scale security datasets.
- Developed behavioral profiling and anomaly detection functionality to establish user activity baselines and identify deviations including after-hours access, abnormal data transfers, and potential privilege misuse.
- Built a full-stack security analytics platform using FastAPI, React, PostgreSQL, and Elasticsearch with JWT-based authentication and role-based dashboards.
- Used Docker to containerize the application and support consistent deployment and application portability.

PROJECTS

Customer Shopping Behavior Analysis **Project Link**

- Developed an end-to-end customer analytics workflow using Python, MySQL, and Power BI to analyze customer purchasing behavior.
- Cleaned, transformed, and prepared raw datasets for reliable analysis and visualization.
- Performed SQL-based analysis to identify customer purchasing trends, product preferences, sales patterns, and business insights.
- Designed an interactive Power BI dashboard to communicate analytical findings through meaningful visualizations.
- Applied data preprocessing, exploratory analysis, SQL querying, and dashboard development throughout the complete analytics workflow.

BankCLI – Java Banking System **Project Link**

- Developed a command-line banking application in Java simulating essential ATM operations including deposit, withdrawal, and balance inquiry.
- Applied Object-Oriented Programming principles to create structured and maintainable application components.
- Implemented user input handling, transaction processing, balance management, and basic validation.
- Strengthened practical knowledge of Java classes, objects, methods, control flow, input/output operations, and exception handling.

CERTIFICATIONS

- **Python Course for Beginners With Certification: Mastering the Essentials** – Scaler Topics, July 2025
- **Java Programming** – Infosys, June 2026

ADDITIONAL INFORMATION

Areas of Interest: Software Development, Web Development, Data Analytics, Computer Networks.

Professional Strengths: Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Continuous Learning
